

ONNI COFFEE COMPANY

BUSINESS PERFORMANCE ANALYSIS
JANUARY – JUNE 2023

KEY FINDINGS (JAN-JUN 2023)

- H1 revenue totalled **699 k€** across three coffee shop locations.
- Total profit reached **501 k€**, corresponding to a profit margin above 70%.
- Tokyo achieved the highest revenue and profit, although performance differences were small.
- Revenue increased consistently throughout the first half of 2023.
- Coffee generated the largest share of revenue and profit in every location.
- Customer demand peaked during the morning hours (8-10 AM).
- Coffee beans and premium beverages offer the strongest growth opportunities.

BUSINESS QUESTIONS

- Which location performs best in terms of revenue and profit?
- Which product categories generate the highest profitability?
- What customer purchasing patterns can be identified?
- Which growth opportunities should management prioritise?

TOTAL SALES

- Revenue is evenly distributed across locations.
- Tokyo leads revenue generation with 237 k€, only slightly ahead of New York and Paris.
- Profit margins are exceptionally high and consistent at 71-72%.
- Operating performance appears highly standardised across locations.

Location	Revenue	Profit	Profit Margin%
New York	230 k€	164 k€	71%
Paris	232 k€	167 k€	72%
Tokyo	237 k€	170 k€	72%

REVENUE AND PROFIT COMPARISON

- Tokyo generated the highest revenue at 236.5 k€.
- Profit performance closely mirrors revenue across all locations.
- The difference between the highest and lowest revenue location is less than 3%.
- The operating model appears scalable and consistently executed.

REVENUE PER MONTH PER LOCATION

- Revenue declined slightly in February across all locations.
- Strong revenue growth started in March and accelerated through June.
- Monthly revenue approximately doubled between February and June.
- Growth patterns were highly similar across all three locations.

REVENUE PER PRODUCT PER LOCATION

- Coffee is the primary revenue driver in every location.
- Tea is the second-largest product category.

PROFIT PER PRODUCT PER LOCATION

- Coffee generates the highest profit across all locations.
- Tea is the second-largest contributor to profitability.

PAYMENT METHOD ANALYSIS

- Card payments are the dominant payment method in all locations.
- Cash remains relevant but accounts for substantially fewer transactions.
- Mobile payments represent the smallest payment category.
- Customer payment preferences are highly consistent across locations.

REVENUE BY TIME OF THE DAY

- Revenue peaks between 8 AM and 10 AM in all locations.
- Tokyo experiences the strongest morning demand.
- Revenue declines close to half after the morning rush.
- Evening demand remains relatively low.

CONCLUSIONS

Conclusions

- Revenue and profit increased steadily during H1 2023, February being exception.
- Tokyo achieved the strongest overall performance.
- Coffee and tea are the key business drivers.
- Customer demand is concentrated in morning hours.
- Payment behaviour is consistent across locations; card payments dominate.

Strategic Recommendations

- Expand premium coffee offerings.
- Optimise staffing around morning peak hours.
- Launch loyalty programmes targeting regular morning customers.
- Review low-performing product categories.
